

**AMENDMENTS TO THE CLAIMS**

The following listing of claims replaces all prior versions of the claims and all prior listings of the claims in the present application.

1. (currently amended) A device for preventing transmission of bodily fluids during sexual relations from a first person to a second person, between two persons, at least one of whom wherein the second person is male, during sexual relations[[,]] the [[said]] device is ~~formed of an~~ comprising:

a first part; and

a second part;

wherein the device is formed of elastic material, [[and]]

wherein the first part ~~said device~~ has an inner side,

wherein at least a portion of the inner side ~~part of which~~ is coated with [[a]] glue ~~provided to fix the said device to the~~ [[man's]] sexual organ of the second person,

wherein the ~~at least a second part of said device consists of a material which is~~ designed ~~provided to rupture upon ejaculation~~ of the second person.

2. (currently amended) The device of as claimed in claim 1, wherein the [[said]] second part comprises:

a first[[,]] stiffer portion designed ~~part, provided to be~~ at least partially disposed ~~be~~ situated in the ~~man's spermatic duct~~[[,]] urethra of the sexual organ of the second person; and

a ~~second~~[[,]] more brittle portion designed part ~~provided~~ to burst upon the ejaculation of the second person, thereby enabling ~~the man's~~ seminal fluid of the second person to flow ~~freely~~ through the [[said]] device.

3. (currently amended) The device of ~~as claimed in~~ claim 1 [[2]], wherein the inner side ~~of the first part~~ is formed as a substantially flat or weakly bending disk,

wherein the first part has ~~having~~ an outer circumference that [[which]] is less than a circumference of a normal-sized erect glans, [[and]]

wherein ~~which, in~~ the middle of the first part[[,]] merges into the [[said]] second part, and wherein the ~~in which said~~ first part is designed ~~provided~~ to be fixed over the mouth of the urethra of the sexual organ of the second person ~~spermatic canal on said glans~~.

4. (currently amended) The device of ~~as claimed in~~ claim 1 [[2]], wherein the [[said]] first part is essentially as large as a normal-sized erect glans, [[and]]

wherein [[at]] one end of the first part merges into the [[said]] second part, and wherein the ~~in which said~~ first part is designed ~~provided~~ to be fixed over the mouth of the urethra of the sexual organ of the second person ~~spermatic canal on said glans~~.

5. (currently amended) The device of ~~as claimed in~~ claim 1, wherein the [[said]] glue retains [[its]] fastening capacity under [[the]] action of normal bodily fluids, and

wherein the glue is dissolved upon application of a liquid that [[which]] does not normally occur naturally in humans.

6. (currently amended) The device of as claimed in claim 5, wherein the said liquid is an organic solvent.

7. (currently amended) The device of as claimed in claim 5 [[6]], wherein the said liquid is ethanol.

8. (currently amended) The device of as claimed in claim 1, wherein the [[said]] glue is of a [[the]] two-component type,

wherein the in which said inner side is coated with a first component that [[which]] is non-adhesive, [[and]]

wherein [[which]] a second component is provided to be coated on a part of the [[man's]] sexual organ of the second person, and

wherein application of the [[said]] inner side, coated with the first component, to the [[said]] part of the [[man's]] sexual organ of the second person, coated with the second component, fixes the device to the [[man's]] sexual organ of the second person.
